

# Cheddar Village

As the A371 leads out of Cheddar it passes the medieval market town of Axbridge before joining the A38, giving easy access to Bristol in the north, the Somerset Levels to the south and the coast to the west.

Winding its way through the stunning Cheddar Gorge, the B3135 is the main link between Cheddar and the Mendip Hills. Walkers, runners and mountain bikers can find a multitude of other routes in and around the gorge, enabling them to enjoy the idyllic countryside and superb views.

Cheddar is a short distance from the ancient town of Glastonbury with its ruined abbey and its famous Tor, visible from miles around. In between lie the amazing and scientifically important Somerset levels, wetlands interspersed with hills such as the Isle of Wedmore.

You'll find a warm welcome in the village pubs, cafés and restaurants of Cheddar. Accommodation ranges from comfortable hotels and B&Bs through to glamping and 'away from it all' camping. There are quirky shops in the gorge and other outlets in the village centre for souvenir hunters and regular shopping.
